

Quantity Discounts

Quantity Discounts counts how many units of your chosen products are in the order and applies the deal when the customer reaches the threshold.

\$0.99 / month

Free trial: 30 days

Clover POS (United States and Canada)

OVERVIEW

How it works

1 The app counts, not the cashier

It watches how many units of your selected items are in the order and applies the deal once the threshold is reached. A weighed line counts as its weight, so 2.5 lb counts as 2.5 towards the threshold.

2 You choose how counting works

Each product separately counts identical items only. **All selected items combined** lets a mix reach the threshold.

3 You choose who gets the discount

Buy N or more, all get the discount discounts every qualifying unit. **For every N bought, 1 gets the discount** is the three-for-two shape.

4 An optional cap

The per-order limit counts order lines, not units. It covers the whole order only with **All selected items combined (any mix)**; with **Each product separately (same item only)** it applies to each product on its own.

5 A schedule like any promotion

Dates and a daily time window, or no date limits at all. Weekdays apply in both cases — a day that is not ticked never runs.

6 The rules live in your account

Discounts are stored in your PayPlaxe account under your Clover merchant, not on one device. The Clover app applies them to orders; the same list opens on every Clover device of the store and in a browser. The sync icon reloads the list from the server.

The app never replaces the Clover Register — it adds to it. Payments, taxes and reporting stay in Clover.

FEATURES

What it does

01

Items or categories

The deal applies to selected items or to whole categories.

02

Threshold quantity

Buy this many to qualify sets when the discount starts. For an item sold by weight the number is read in those units — 3 means 3 lb, not three separate weighings.

03

Two discount modes

Buy N or more, all get the discount, or **for every N bought, 1 gets the discount**. On goods sold by weight the second mode discounts only whole lines that fit the amount earned, so a single heavy weighing can get nothing.

04

Counting rules

Count **each product separately** or **all selected items combined**.

05

Per-order limit

Limit discounted items per order (BETA) caps how many order lines the deal may discount — for this cap alone, a weighed line counts as one however much it weighs. With **All selected items combined (any mix)** the cap covers the whole order; with **Each product separately (same item only)** it applies to each product on its own, so a basket with several qualifying products can exceed it.

06

Items sold by weight

For a per-lb or per-kg item the threshold is measured in those units: **Buy this many to qualify** = 3 means 3 lb, and one 3 lb weighing meets it on its own. The rule that a line counts as one applies only to **Limit discounted items per order**.

07

Amount or percentage

A fixed amount or a percentage off each qualifying item.

08

Schedule

Dates and times or no date limits, plus weekdays. An unticked weekday never runs, even with **No date limits**.

09

Restrictions

Decide which employees may add or edit discounts on the Clover device.

Settings → **Restrictions** opens for managers and admins only, and the restrictions are not applied in the browser.

10

Web version

quantitydiscounts.payplaxe.com (<https://quantitydiscounts.payplaxe.com>) opens the same discount list and the same editor in a browser. It is the same app you already have on Clover — the setup side of it, with nothing extra to buy. Sign in with **Login via Clover**: your Clover account, no password and no QR code. It edits the rules only — the discount itself is put on the order by the Clover device at the register.

INSTALL

Price & installation

\$0.99 / month

📥 **Install on Clover App Market** (<https://www.clover.com/appmarket/apps/06C1YGCNN5B4R>)

Every app has a 30-day free trial. Clover bills the subscription with your monthly Clover invoice.

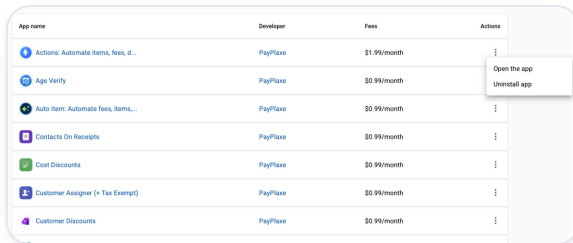

How to install

1. Open the **Clover App Market** — on the device, or at `clover.com/appmarket` in your web dashboard.
2. Find the app by name, or open its direct link from the button above.
3. Tap `Connect` / `Install` and accept the permissions the app requests.
4. The 30-day free trial starts automatically. The subscription then appears on your monthly Clover invoice.
5. Open the app on the Clover device and sign in with a **Manager** or **Admin** employee account to configure it.
6. To cancel later, uninstall the app from the App Market — the steps are right below.

How to cancel the subscription

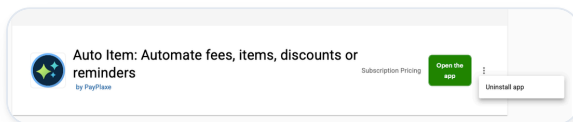

Cancelling means uninstalling the app — there is no separate billing screen.

1. Open the **App Market** — on the Clover device, or in the web dashboard.
2. Open **My Apps**. Every app you pay for is listed there with its monthly fee.

App name	Developer	Fee	Actions
Actions: Automate items, fees, d...	PayPlace	\$1.99/month	⋮
Age Verify	PayPlace	\$0.99/month	⋮
Auto Item: Automate fees, items, ...	PayPlace	\$0.99/month	⋮
Contacts On Receipts	PayPlace	\$0.99/month	⋮
Cost Discounts	PayPlace	\$0.99/month	⋮
Customer Assigner (+ Tax Exempt)	PayPlace	\$0.99/month	⋮
Customer Discounts	PayPlace	\$0.99/month	⋮

3. Tap the ⋮ button on the app's row and choose **Uninstall app**.
4. The app's own page works too: ⋮ next to the green **Open the app** button → **Uninstall app**.

5. Confirm. The subscription stops there and then — the app is off your next Clover invoice.

Install and cancel any time from the Clover App Market.

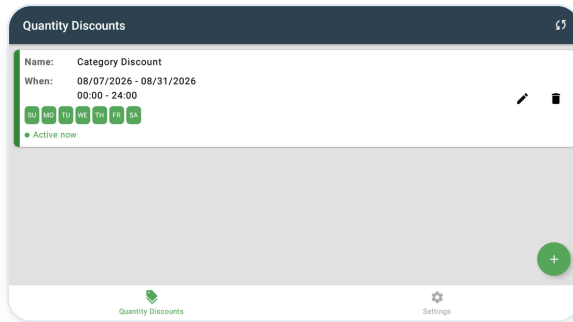

START HERE

First setup

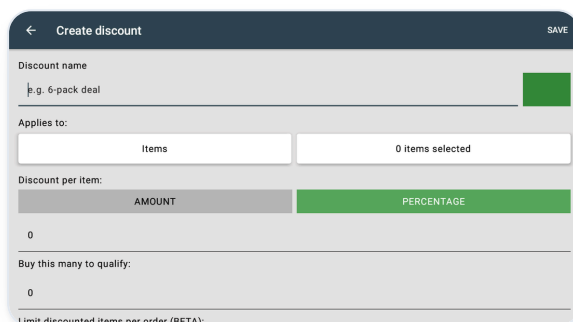

Do this once, in this order. It takes a few minutes and the app is then ready for the shift.

1. Open **Quantity Discounts**.

The list shows each deal with its period, weekdays and status.

2. Tap **+** to create a discount.

3. Enter a name (e.g. **6-pack deal**), pick a colour, then set **Applies to** = **Items** or **Categories** and select them.

4. Set **Discount per item** — **AMOUNT** or **PERCENTAGE** — and the value taken off each qualifying unit.

5. Set **Buy this many to qualify** , then choose **How items are counted** and **How the discount works** .

For an item sold by weight the threshold is in lb or kg, not in pieces.

6. Optionally open **Limit discounted items per order (BETA)** and set a cap.

7. Choose **Set dates and times** or **No date limits**, tick the weekdays and save.

8. Build a test basket at, just below and just above the threshold before opening the store.

Quantity rules are easy to get subtly wrong — always test with a real basket.

CONFIGURATION

Setup scenarios

Each scenario is a complete configuration — follow the steps in order.

Most configuration screens require the Clover employee role of Manager or Admin.

1 Six-pack deal on a single product

Buy six of the same drink, get a discount on every one of them.

1. Open **Quantity Discounts** → **Quantity Discounts** and tap **+**.
2. Name it **6-pack deal** and pick a colour.
3. **Applies to** = **Items**, then select the drink.
4. **Discount per item** = **Amount** or **Percentage**, and enter the value.
5. **Buy this many to qualify** = 6.
6. **How items are counted** = **Each product separately (same item only)**.
7. **How the discount works** = **Buy 6 or more, all get the discount**, then set the schedule and save.

2 Three for the price of two, across a category

Any mix of products from one category counts towards the threshold. The app does not pick the cheapest unit — with a 100% discount the free unit can be any qualifying line, so use this only where the products are priced alike.

1. Create a discount and set **Applies to** = **Categories**, then select the category.
2. Set **Discount per item** = **Percentage** 100 so the free unit costs nothing.
3. **Buy this many to qualify** = 3.
4. **How items are counted** = **All selected items combined (any mix)**.
5. **How the discount works** = **For every 3 bought, 1 gets the discount**.
6. Set the weekdays and time window and save.

Test with a real basket before opening: quantity rules are easy to get subtly wrong, and the register is where it shows. If the products in the category differ in price, the discounted unit is not guaranteed to be the cheapest one. With goods sold by weight this mode discounts only whole lines that fit the amount earned, so a single heavy weighing can get nothing — for weighed goods use **Buy N or more, all get the discount** with a percentage instead.

3 Bulk pricing with a cap

Encourage volume without letting one customer clear the shelf at the discounted price.

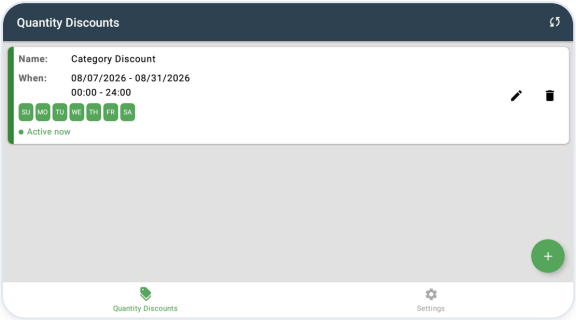

1. Create the discount with your items and threshold as usual.
2. Set **How items are counted** = **All selected items combined (any mix)** — this is the only counting mode where the cap covers the whole order.
3. Open **Limit discounted items per order (BETA)** and choose **Set a limit**.
4. Enter the maximum number of discounted lines per order in **Max discounted items**. Each line on the ticket counts as one, so a weighed line counts as one however much it weighs.
5. Set the date range if the offer is temporary; otherwise choose **No date limits**.
6. In **Settings** → **Restrictions**, limit who may edit discounts. The screen opens titled **Permissions**, and only managers and admins can open it.

REFERENCE

Screens and settings

Every screen of the app and what each setting does. (6)

Discounts list

Name / When

The deal name and its schedule; **Endless** means no date limits.

Weekday chips

The days the deal runs on.

Status

Active now · Ended · Disabled · No days selected · Starts in **Disabled** cannot be changed in the app or in the browser — there is no on/off switch for a deal; ask support to clear it.

Sync icon

Reloads the discount list from the PayPlaxe server.

+ button

Creates a new deal.

Discount editor

← Create discount

SAVE

Discount name

e.g. 6-pack deal

Applies to:

Items

0 items selected

Discount per item:

AMOUNT

PERCENTAGE

0

Buy this many to qualify:

0

* limit discounted items per order (BETA):

Discount name

Required, e.g.

6-pack deal

.

Applies to

Items or Categories, then the selection with its count.

Discount per item

AMOUNT off each item, or PERCENTAGE off each item.

Buy this many to qualify

The threshold quantity, 0 or more. **0 means no minimum** — every selected item is discounted on every order, so enter the real threshold before saving. For an item sold by weight the threshold is read in those units: 3 means 3 lb, and a single 3 lb weighing meets it.

Limit discounted items per order (BETA)

No limit or Set a limit with a maximum per order (at least 1).

How items are counted

Each product separately (same item only) or All selected items combined (any mix).

How the discount works

Buy N or more, all get the discount or For every N bought, 1 gets the discount.

When it runs

Set dates and times (From / To date and daily time window) or No date limits. The weekday chips apply to both — a day that is not ticked is a day the deal does not run, even with No date limits.

Select an item

Where

Opens from **Applies to** = **Items** in the editor. The title bar reads **Select an item**.

Category panel

Your Clover categories down the left. A badge on a category shows how many of its items are selected.

Search...

Filters the items of the open category by name.

Select all / Deselect all

Selects or clears every item listed in the open category.

Barcode

Scanning a barcode finds that item in the list.

CONFIRM

Returns the selection to the editor, where the count next to **Applies to** updates.

Select categories

Where

Opens from **Applies to** = **Categories** in the editor.

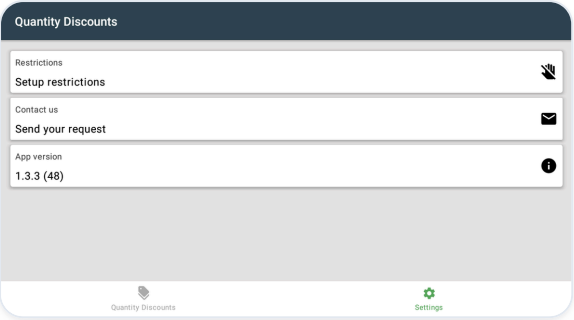

Rows

One row per Clover category, with **Name:**, **Items:** — how many items it holds — and a tick box.

SAVE

Returns the ticked categories to the editor. This screen has no search field.

Settings

Restrictions

Per employee: **Add/edit discounts** . The screen opens titled **Permissions** , and only managers and admins can open it — another role gets **Only managers and admins can configure it** . Admins cannot be restricted and a manager cannot restrict another manager. The restrictions cover the Clover app only.

Contact us

Support request from inside the app.

App version

The installed version.

Web version

The same discounts in a browser, on a computer, a tablet or a phone.

Where it opens

Any browser. Nothing to install.

Login via Clover

The only sign-in: your Clover account, no password and no QR code. **Quantity Discounts** must have been opened on the Clover device at least once, otherwise the page answers **Open Quantity Discounts on your Clover POS, then try again.**

Menu

Two entries: **Quantity Discounts** (the list) and **Settings**.

The list

The same cards, colours, weekday chips and statuses, with an edit and a delete icon on each row and a  button. There is no sync icon — the list reloads when the screen opens.

The + button

Asks for a name and saves the new discount on the server straight away, before the form is filled in; on the Clover device nothing is stored until you save. A delete takes effect at once and cannot be undone.

Settings

 (read-only),  and . There is no  screen, and restrictions set on the Clover device are not applied in the browser.

Not in the browser

Everything at the register. The browser never adds or removes a discount on an order — the Clover app on the device does that.

AT THE REGISTER

Everyday use

What the cashier does after the app is configured.

1. Nothing to press — the deal applies itself once the basket reaches the threshold.
2. The discount appears on the order lines, so the customer sees it before paying.
3. If a limit is set, lines beyond the cap are charged at full price. The cap counts order lines, and it covers the whole order only when counting is **All selected items combined (any mix)**.
4. On goods sold by weight the threshold is counted in lb or kg: one 3 lb weighing can trigger a deal set to 3, and with **For every N bought, 1 gets the discount** a heavy line can get no discount at all.
5. Outside the schedule the deal simply does not apply; the card in the app shows why.

IF SOMETHING IS WRONG

Troubleshooting

Symptom on the left, what to do on the right.

The deal does not trigger with a mixed basket.

Set **How items are counted** to **All selected items combined (any mix)**.

Every unit is discounted when only one should be.

Switch **How the discount works** to **For every N bought, 1 gets the discount**.

A weighed item gets no discount with For every N bought, 1 gets the discount.

That mode discounts only whole lines that fit the amount earned, lightest line first. With **Buy this many to qualify** = 3, a single 9 lb line gets nothing, and 8 lb + 1 lb discounts only the 1 lb line. For goods sold by weight use **Buy N or more, all get the discount** with a percentage.

Enter a discount name or **Discount limit must be at least 1** when saving.

The name is empty, or **Set a limit** is chosen with **Max discounted items** left at 0. Fill the name; enter 1 or more, or switch back to **No limit**.

Start time must be before end time.

The daily window is reversed. Set the start earlier than the end, or use **No date limits**.

Start date must be before end date.

The **From:** date is later than the **To:** date. Correct the dates, or choose **No date limits**.

Settings → **Restrictions** will not open.

Only managers and admins can configure it means the employee signed in on the device has another role — sign in as a manager or an admin. **Reinstall the app to enable this feature** means the app is missing the Clover employee permission; reinstall **Quantity Discounts** from the Clover App Market.

New items are missing from the picker.

Close and reopen the picker — it reads your Clover inventory each time it opens. If the item still does not appear, check that it is saved in Clover Inventory; a brand-new item can take a moment to publish to the device.

The app's dialog never appears on the payment screen; Clover shows "Customer is choosing payment method".

Open the Clover **Setup** app → **Payments** and uncheck **Automatically take payment on Connected Device**, so payment is taken on the primary device.

Settings cannot be opened or changed.

Sign in with an employee whose Clover role is **Manager** or **Admin**. Some apps also have their own **Restrict access** switch that locks the configuration.

The app works erratically, or stops reacting after the device has been idle.

Turn off Battery Saver in the device's Android settings and keep the device online.

A change made on one device is not visible on another.

Settings sync through the cloud; give it a minute and make sure both devices have a network connection.

QUESTIONS

FAQ

What is the difference between the two discount modes?

Buy N or more, all get the discount discounts every qualifying unit. **For every N bought, 1 gets the discount** discounts one unit per group — the three-for-two pattern.

Can a mix of different products count towards the threshold?

Yes, if you set counting to **All selected items combined (any mix)**.

Can I stop one customer taking the whole shelf?

Only partly. Set a limit in **Limit discounted items per order** and set **How items are counted** to **All selected items combined (any mix)** — that is the only combination where the cap applies to the whole order.

Why is my discount not active?

Check the status on the card. **No days selected** and **Ended** you fix yourself — tick the weekdays, or extend the dates; a countdown shows when a future deal starts. **Disabled** has no switch in the app or in the browser, so contact support to clear it.

Can I do this from a computer?

The rules, yes. quantitydiscounts.payplaxe.com (<https://quantitydiscounts.payplaxe.com>) opens the same discount list, the same editor and the item and category pickers in a browser, and signs in with **Login via Clover**. Open **Quantity Discounts** on the Clover device once first, otherwise the page answers **Open Quantity Discounts on your Clover POS, then try again**. What happens at the register cannot be done there: the browser never puts a discount on an order — the Clover app does that. There is no **Restrictions** screen in the browser and restrictions are not applied there, so anyone who can sign in with your Clover account can create, edit and delete discounts.

How much does it cost?

\$0.99 per month, with a 30-day free trial.
